Full-stack software engineer with 9+ years of experience building enterprise applications, cloud services, and AI-assisted developer tooling across ASP.NET Core, React, and AWS. Experienced integrating LLMs into production workflows, building resilient backend services, and solving complex distributed systems challenges.

EXPERIENCE

Software Developer

Packless Industries — Waco, TX | Nov 2025 – Present

- Develop and extend enterprise warehouse systems by building Microsoft Dynamics 365 Business Central extensions (AL) and ASP.NET Core applications supporting manufacturing and logistics.
- Integrated Anthropic Claude into an internal engineering platform, creating AI workflows that analyze bugs, guide developer questions, generate solutions, and create reviewable Git branches.
- Designed thread-safe caching, concurrency control, and resiliency patterns for high-traffic ASP.NET Core services, including per-key cache synchronization, centralized rate limiting, and circuit-breaker protection for Business Central integrations.
- Built the Business Central integration layer with MSAL token caching, request throttling, and observability to improve reliability.
- Designed a fail-closed authorization framework with centralized page registration, role-based permissions, per-user overrides, and automated permission synchronization to manage access across 100+ application pages securely.

AI Data & Software Engineering Contributor

Snorkel AI — Remote | Nov 2025 – Present

- Develop benchmark-quality software implementations that serve as reference solutions for training and evaluating large language models on complex programming tasks.
- Assess AI-generated code for correctness, edge cases, performance, and maintainability, helping define the engineering standards used to measure coding model quality.
- Contribute across multiple programming languages and frameworks, applying software engineering best practices to improve the reliability and consistency of AI evaluation datasets.

Web Developer (Contract)

Square 205 — Denton, TX | Nov 2024 – Oct 2025

- Delivered client sites on WordPress/WooCommerce and React, owning planning through deployment in Agile sprints.
- Improved site performance and search visibility through SEO and front-end tuning.
- Managed hosting, domains, and ongoing support as primary technical point of contact.

Programmer

CTDI — Flower Mound, TX | Jan 2023 – Aug 2024

- Built internal logistics and inventory apps using **ASP.NET MVC, SQL Server, and jQuery** to streamline warehouse operations.
- Programmed Arduino-based diagnostic systems that replaced manual functionality checks on mobile devices, reducing QA effort and improving test consistency.

Senior Software Developer

IDo Systems — Remote | Mar 2022 – May 2024

- Architected and deployed a **microservices** platform on PHP (Laravel) and AWS, improving scalability and enabling independent service deployment.
- Built automated testing and CI/CD-supported cloud deployments, reducing release errors and deployment time.

Owner / Software Architect

BlackBox Software — Irving, TX / Remote | Sep 2017 – Nov 2020

- Founded and led a 5-developer team delivering custom software and IoT systems for client organizations.
- Owned architecture and delivery across web and embedded projects, from client requirements through deployment.

EDUCATION & CERTIFICATIONS

B.S. Computer Science, Colorado Technical University — Aug 2024

A.A.S. Computer Programming, Texas State Technical College — Apr 2022

Google AI Essentials (2025) • Google Project Management (2025) • Google IT Support (2024)

SKILLS

Languages: JavaScript, TypeScript, Python, C#, PHP, Java, SQL

Frontend & Backend: React, React Native, Node.js, Express, .NET Core, Laravel, Django, FastAPI

Cloud & DevOps: AWS, Azure, GCP, Docker, Jenkins, CI/CD, Linux, Git

Data & Tools: MySQL, SQL Server, MongoDB, Oracle, Postman, Selenium, Business Central (AL)
